SATUSTEAM™ WEED CONTROL

## GREEN NINJA

## Green Ninja Stealth Product Specifications

**Fast heating, high volume delivery gives you the fastest hydro thermal weed kill available**

The Green Ninja Stealth is the most affordable, compact and manoeuvrable unit available.

With a standard 30m of hose supplied and ability to add a further 30m extension, you'll get great access and coverage. This diesel fuelled heat exchanger is the most efficient of its kind. With an electric water pump and power source the Green Ninja Stealth is the quietest machine available.

The Green Ninja Stealth has been developed for killing weeds in confined areas with low inclines, such as nurseries, school playgrounds, and hobby farms, with easy access to 240V 10 AMP power supply. Connect directly to any garden tap or a water tank for the water supply. This machine also has a multitude of cleaning capabilities.

## The Ultimate Solution in Organic Weed Control

- ✓ Most affordable and simple unit
- ✓ Delivers 5L Satusteam™ per minute which will increase productivity and improve pressure cleaning functionality
- ✓ Quieter than other models
- ✓ Low maintenance costs
